## PROFILE

---

I began learning to code at the age of 20 during my 3-year college diploma, starting with C#. Over time, I expanded into JavaScript, Java, and TypeScript, building websites, mobile apps, and games. I have developed full-stack web apps using React, ASP.NET, and SQL Server Management Studio, and mobile apps with React Native and Supabase, as well as Android Studio with Firebase and REST API integration. On the games side, I've built projects in C# and C++ using MonoGame, Unity, and Unreal Engine. My first job was at Evania Healthcare Clinic, where I developed a mobile application to assist patients of the clinic.

## EMPLOYMENT HISTORY

---

**Mobile Application Developer** — Evania Healthcare Clinic, Richmond Hill

*April 2025 — Present*

- Developed a healthcare app helping patients manage and review their medical screenings
- Stored screening data securely in a managed database
- Built recommendation logic to suggest relevant medical procedures based on patient screening results

## EDUCATION

---

**Post-Graduate Certificate, Game Development — Advanced Programming** — Sheridan College, Ontario

*2025 — 2026*

Specialized post-graduate program focused on advanced game programming, including engine architecture, gameplay systems, and applied software design for interactive entertainment.

**Computer Programming and Analysis — Advanced Diploma** — Conestoga College, Waterloo

*September 2022 — April 2025*

Graduated with notice. Studied a range of programming languages, frameworks, databases, and API integration techniques.

**High School Diploma** — Richmond Hill High School, Richmond Hill

*September 2016 — June 2020*

Graduated with university-level English, Math, Biology, Chemistry, and a Specialist High Skills Major (SHSM).

## SKILLS

---

**Languages:** JavaScript, TypeScript, C++, C#, Java, Python
